We are actually looking for a

Business Analyst

Optimact: Who we are?

We are a growing solutions company active in the field of Supply Chain Planning and Control. The Optimact Solution was built to support and facilitate customers. Optimact's cloud-based solution connects people, data, processes and plans across the enterprise, bringing different supply chain planning domains together.

We see Optimact as a tool to achieve results. Without addressing a number of external environmental factors, such as processes and organization, the best tool in the world will not deliver results. Optimact has therefore set up a toolkit that uses the tool as a means to achieve results.

Our solution covers all aspects of Supply Chain Planning

Demand Planning

Optimal Forecast
Life Cycle Management
Collaboration

Inventory Managment

Inventory Strategy
Optimal Parameters
Optimal Order

Distribution & Production Planning

Distribution & Production
Master Planning
Capacity Management

Sales & Operations Planning

Dashboard
Consensus Planning
Collaboration

Supply Chain Analytics

Management by Exception
Performance Monitoring
Permanent Analysis

More information can also be found at www.optimact.com

Function: What we are looking for?

As a Business Analyst you will support our implementation consultants and customers and translate their dreams in reality. Practically you translate design specifications into detailed SQL coding which you produce, test and align with the implementation consultants.

As Qlik Sense is fully integrated within Optimact we expect also that you understand business requirements and translate these into Qlik dashboards. You will also be involved in the creation of the dashboard and reports in Optimact.

As a Support Agent you are also in contact with the end users or other parties involved who have functional, technical and / or ICT-related matters when using the

Optimact web application. Together with our implementation consultants you solve their issues.

You are involved in the daily management and maintenance of Optimact, logging problems and activities in the JIRA system (support and ticketing system) and suggest possible improvements of the Optimact functionality, in the field of customer support and system management.

You have enough analytical insight to help you think about solutions and their implementation, you like to translate technical setups into solutions and results and are interested to develop your knowledge of Supply Chain Management and its translation into Optimact. We have an ambitious development plan that will make the most of your knowledge and experience.

Your Profile: What we expect

Your profile:

- You have a bachelor's or master's degree in computer science or equivalent through experience- You have experience with SQL (MS SQL Server or mySQL)

- You have experiences with Qlik Sense or any other BI tool

- Experience with Supply Chain Management is a plus

- Experience with ERP systems or legacy systems is a plus- You speak Dutch and English, French is a plus

- You are flexible, driven and a team player

- You like to communicate with people

- SCRUM experience is a plus

- Strong analytical skills

Our Offer: What you can expect

We offer a challenging environment with a lot of room for personal input to shape the business and the job, and grow personally in your profession.

We offer a competitive compensation according to your experience. Different possibilities in relation with contract types. Home office possibilities

Please send your CV to gunter.fonteyne@optimact.com
